**BID FOR THE APPOINTMENT OF A SERVICE PROVIDER TO SUPPLY AND INSTALL
INVISIBLE PERIMETER FENCE AT KABOKWENI INDUSTRIAL PARK**

1. INTRODUCTION

The Mpumalanga Economic Growth Agency, hereinafter referred to as “**MEGA**” is a schedule 3D entity of the Mpumalanga Provincial Government with a mandate of stimulating economic growth in the Province through inter alia:-

- (i) the provision of funding to SMMEs, Co-operatives and Agricultural enterprises, as well as the provision of housing loans to citizens of Mpumalanga within the gap market;
- (ii) proactively identifying investment opportunities within the Province, attracting investment into such opportunities through various trade and investment promotion initiatives, as well as facilitating that such investments into the province derive maximum development impact;
- (iii) delivering massive infrastructure within the Province;
- (iv) the development and management of property in the form of industrial parks which stimulate economic activity in the Province.

In exercising its powers and functions as articulated in the Act, [“the MEGA Act 1 of 2010”], the entity must continually broaden the participation of Mpumalanga citizens in all the sectors of the economy and accordingly contribute, whether directly or indirectly, to the alleviation of poverty, unemployment and inequality.

2. PURPOSE

The Mpumalanga Economic Growth Agency intends to appoint a credible and experienced service provider for the supply and installation of an invisible perimeter fence at Kabokweni Industrial Park: Cluster 4.

3. BACKGROUND

Kabokweni Industrial Park, located within the Ehlanzeni District Municipality, is one of the Mpumalanga Economic Growth Agency's (MEGA) strategic industrial properties comprising multiple factory units that support manufacturing activities, employment creation, and economic development.

As part of its ongoing turnaround strategy, MEGA is implementing coordinated maintenance and security enhancement initiatives to rehabilitate its industrial parks, safeguard assets, reduce incidents of theft and vandalism, improve tenant confidence, and enhance the marketability of its properties. Cluster 4 has been identified as a priority for security upgrades due to its strategic importance to the Ehlanzeni property portfolio and its mix of occupied, vacant, and operational facilities.

A security assessment identified the need to replace the existing dilapidated perimeter fencing with a new secure perimeter fence and controlled access gates to strengthen access control, protect MEGA's assets and tenant properties, prevent unlawful access and encroachment, and create a safer, more secure environment that supports the continued revitalisation and sustainability of the Industrial Park.

4. SCOPE OF WORK

The intended scope of work will include tasks such as site establishment or preparation, excavation of trenches in preparation for laying concrete footings, installation of perimeter fencing complete with supporting posts, installation of access gates, guardhouse installation, clearing of overgrown land with thorny bushes and trees using excavator or motor grader, etc. The scope of work may also require the potential service provider to adhere to safety regulations, using appropriate tools, and potentially obtaining permits where required.

a) Site Preparation:

This involves clearing the area of debris, marking boundaries, and potentially levelling the ground.

b) Post Installation:

This includes digging post holes, setting posts (with concrete), and ensuring they are plumb and properly spaced.

c) Panel Installation and Securing bottom Panel with Concrete strips for extra strength:

Carefully installing/mounting the panels between the posts using appropriate screws as per the specification while ensuring that the panel doesn't warble. Bottom surface of panels to be completed with a concrete mix of at least 150mm from ground level, with a mix ratio of 20MPa

d) Gate Installation:

The scope covers the installation of the gate posts, rails, and latch mechanisms.

e) Finishing Touches:

This can include tasks like staining the fence, installing caps on posts, or making any necessary repairs.

f) Guardhouse Renovation:

Rehabilitation of existing security guardhouses, complete with covered veranda, outdoor flood lights and provision of fire extinguishers for compliance purposes. Electrical work included as well.

g) Safety and Compliance:

Adhering to safety regulations, using proper tools (such as post hole diggers, hammers, saws), and potentially securing necessary permits are also part of the scope.

h) Quality Control:

Ensuring the fence is straight, sturdy, and meets the agreed-upon specifications is crucial.

i) Communication:

Reporting on work progress and communicating with the client or project manager is essential.
