WATER AND SANITATION BUSINESS UNIT

BID NAME

ADVERTISEMENT: APPOINTMENT OF A SERVICE PROVIDER TO RECONSTRUCT A COLLAPSED SEWER PIPELINE - OLIEVENHOUTBOSCH

BID NUMBER

(Q54-2026-27)

1. INTRODUCTION AND PURPOSE

The City of Tshwane is responsible for operations and maintenance of its Wastewater Collection network through its Water and Sanitation Business Unit. The Business Unit has experienced sewer spillages in the Olievenhoutbosch areas caused by a collapsed Wastewater Collection pipeline and a sewer manhole which affects a block consisting of 20 Households and spilling on average 3.5 L/S of raw sewer into the households.

The objective of this project is to procure a service to enable the Business Unit to conduct corrective maintenance on the sewer pipeline by repairing it and restoring the normal flow of the sewer in the network. The pollution of the environment by raw sewer is may potentially cause health problems for people exposed to it and it is a direct contravention of the National Environmental Management Act by the Municipality. The city seeks to utilize the Quotation Advertisement Request which allows for a maximum expenditure of R 750 000.00 as per the City of Tshwane Supply to resolve the sewer spillage.

2. BACKGROUND

The area of Olievenhoutbosch is a formalized area with Low-cost housing, occupied by approximately 71 000 People (Sensus 2011) living in 23 777 households. The project of procuring services for the reconstruction of the Wastewater Collection Pipeline located at Cabbage Tree in Olievenhoutbosch as a result of the collapsed pipeline is necessary due to the spillage that is experienced, where 3.5L/S of sewer is exposed into the atmosphere and households. The spillage affects around 20 households with some homes experience sewer backing up in their houses (Toilets and Baths).

The pipeline affected is a mid-block pipeline which cuts across the row of houses before connecting to the downstream manhole at the entrance of 3353 Cabbage Tree street. Internal maintenance crews were dispatched to address the sewer problem, however, were unable to due to the complexity of the works where they had to break permanent structures to access the pipeline. The site was also found to have a high-water table which saturated the ground as they attempted to conduct the repairs and caused unsafe conditions due to inadequate equipment and materials.

The site is also located in a urban area that is described as a slum, where there are housing structures extended and built on servitudes, and hence make it complex to resolve the problem.

The objective of this project is to procure a service to enable the Business Unit to conduct corrective maintenance on the sewer pipeline by repairing it and restoring the normal flow of the sewer in the network.

The stakeholders involved include:

- The City of Tshwane Metropolitan Municipality,
- Community leaders of the areas affected, recognized as Councillors,
- Bidders, Suppliers and manufacturers,
- All regulatory bodies that may be involved.

Controls are established where the City follows the available contracts management strategies where appointed officials will carry out quality control of the services rendered and maintain the standard of the City of Tshwane by utilizing **the Standard Specifications for Municipal Civil Engineering Works, Third edition 2005.**

10. MARKET ANALYSIS

The city of Tshwane reserves the right to conduct market analysis. Should the city exercise this option, where a tenderer offers a price that is deemed not to be viable to supply goods or services as required, written confirmation will be made with the tenderer if they will be able to deliver on the price, if a tenderer confirm that they cannot, the tenderer will be disqualified on the basis of being non-responsive. If they confirm that they can deliver, a tight contract to mitigate the risk of non-performance will be entered into with the service provider. Further action on failures by the supplier to deliver will be handled in terms of the contract including performance warnings and listing on the database of restricted suppliers.

The city further reserves the right to negotiate a market related price with a tenderer scoring the highest points. If the tenderer does not agree to a market-related price, the city reserves the right to negotiate a market-related price with the tenderer scoring the second highest points, if the tenderer scoring the second highest points does not agree to a market-related price, negotiate a market-related price with the tenderer scoring the third highest points. CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Municipal Bidding Document (MBD) must form part of all bids[1] invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).[2] Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

a. take all reasonable steps to prevent such abuse;

b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and

c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

[1] Includes price quotations, advertised competitive bids, limited bids and proposals.

[2] Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
