TECHNICAL EVALUATION CRITERIA

Category	Weight	Scoring Methodology	Evidence Required
1. Bidder Experience and Proven Installed Base of Industrial Shot Blast Booths	**50 Points**	**50 Points:** Four (4) or more completed Shot Blast Booth installations. **35 Points:** Two (2) to Three (3) completed Shot Blast Booth installations. **25 Points:** One (1) completed Shot Blast Booth installation. **0 Points:** No completed Shot Blast Booth installation submitted.	For each claimed completed installation, submit: (a) signed completion or commissioning certificate, or client reference letter; (b) client name and installation location; (c) brief scope confirming an industrial shot blast booth of comparable nature; and (d) completion date. Only completed projects within the last fifteen (15) years will be scored. Transnet may verify all claims. One project may only be counted once. Previous Pressure Equipment Certificate, AIA Certificate, or SANS 347 Compliance Certificate from a similar project. Only completed Shot Blast Booth projects executed within the last fifteen (15) years will be accepted. Transnet reserves the right to verify any installation claimed.
2. Engineering Resources and Statutory Compliance Capability	**25 Points**	**25 Points:** Submission of Three (3) documents. **20 Points:** Submission of Two (2) documents. **15 Points:** Submission of One (1) documents **0 Points:** No acceptable documents submitted.	Submit valid proof of current ECSA registration for the personnel proposed for: 1. Mechanical engineering; 2. Electrical engineering; and 3. Civil or structural engineering. The bidder shall identify each person, discipline, registration category and intended project role. Equivalent registrations recognised for work in South Africa may be submitted, subject to proof of recognition. 1. ECSA Registration Certificate for Mechanical Engineer/Technologist. 2. ECSA Registration Certificate for Electrical Engineer/Technologist. 3. ECSA Registration Certificate for Civil Engineer/Technologist.

Category	Weight	Scoring Methodology	Evidence Required
3. Methodology and Project Programme	25 Points	25 Points: all six requirements addressed. 20 Points: five requirements addressed. 15 Points: four requirements addressed. 10 Points: three requirements addressed. 5 Points: one or two requirements addressed. 0 Points: no acceptable methodology and programme submitted.	Submit a project execution methodology and a project programme covering all six requirements: 1. Design, site verification and engineering approvals; 2. Manufacturing and procurement; 3. Civil, structural, rail and installation work; 4. Mechanical, electrical, control, ventilation and safety-system installation; 5. Testing, statutory inspection, certification and commissioning; and 6. Training, handover documents, warranties and support. The programme must show durations, dependencies, key milestones and the path from contract award to final acceptance. The bidder shall also submit a project programme indicating durations and milestones from contract award to final commissioning.
TOTAL WEIGHTING	**100 Points**		
MINIMUM QUALIFYING SCORE	**80 Points**	Tenderers must achieve a minimum score of 80 points out of 100 to proceed to the next stage of evaluation.
