5.2 If the Tenderer/Service Provider/Contractor has committed a transgression through a violation of section 3, or any material violation, such as to put its reliability or credibility into question. The imposition and duration of the exclusion will be determined by the severity of the transgression. The severity will be determined by the circumstances of the case, which will include amongst others the number of transgressions, the position of the transgressors within the company hierarchy of the Tenderer/Service Provider/Contractor and the amount of the damage. The exclusion will be imposed for up to a maximum of 10 (ten) years. However, Transnet reserves the right to impose a longer period of exclusion, depending on the gravity of the misconduct.

No Tender shall be awarded to a Tenderer whose name (or any of its members, directors, partners or trustees) appear on the Register of Tender Defaulters kept by National Treasury, or who have been placed on National Treasury's List of Restricted Suppliers. Transnet reserves the right to withdraw an award, or cancel a contract concluded with a Tenderer should it be established, at any time, that a tenderer has been restricted with National Treasury by another government institution.

SECTION 1

1 Description of the *works*

1.1 Executive overview

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into four major business segments, namely containers, bulk, break bulk and automotive.

The Richards Bay Terminal is a material handling plant comprising of the Dry Bulk Terminal (DBT) and the Multi-Purpose Terminal (MPT). The two terminals are for importing and exporting different cargoes using mobile fleet, ship loaders, ship unloaders, stackers, stacker reclaimers and a network of conveyors.

The Delkor plant plays a critical role in supplying water used for cleaning conveyor systems in the galleries. This cleaning is essential to eliminate cross-contamination between different commodities. Over time, the structural components of the Delkor plant, including steel walkways, trusses, piping supports, and exposed mechanical features, have shown visible signs of corrosion due to constant exposure to water, chemicals, and humidity.

A recent site inspection confirmed advanced corrosion in several areas, particularly on load-bearing steel frames and piping elements. This poses a structural integrity risk and requires urgent corrosion treatment to extend the service life of the infrastructure and ensure safe operations.

1.2 *Employer's* objectives

The service provider is required to assess, treat, and protect the corroded structures at the Delkor plant in accordance with industry standards and Transnet specifications.
